Summary

Full-stack Typescript developer with 3+ years of experience in Agile environments, delivering scalable web and mobile applications from architecture to deployment. Experienced in converting designs into interactive interfaces, developing real-time collaborative platforms and authentication systems, with expertise in monorepo architectures, CI/CD, automated testing, performance and accessibility enhancements.

Skills

Languages: JavaScript, Typescript.
Frontend: React, React Native, Next.js, Expo, TailwindCSS, RSC, state management.
Backend: Node.js, Bun, Express, Hono, JWT, microservices, OAuth, REST APIs, websockets.
DevOps: Docker, Git, GitHub Actions, CI/CD.
Databases: MySQL, MongoDB, PostgreSQL, Redis, ORMs, query builders.
Cloud & Platforms: AWS EC2, Azure Functions, Cloudinary, Neon Postgres, Supabase, Vercel.

Experiences

Full-stack Developer *December 2025 – February 2026*
Chingu – Voyage Program | Remote

- Led task estimation and backlog refinement with JIRA while building Confido in an agile workflow.
- Converted Figma designs into frontend code, with a flashcard-style UI, role-selection, feedback, and summary views.
- Configured CI workflows with GitHub Actions, implemented API and database health checks, and enforced code quality with ESLint.
- Implemented unit tests for APIs and frontend components using Vitest, automated with pre-commit hooks and CI workflows.

Software Developer Intern *June 2024 – November 2024*
DreamLabs – Internship | On-site

- Supported the development team in building and maintaining web applications within an agile workflow.
- Assisted in implementing responsive user interfaces, reusable components, and API integrations.
- Improved application performance, accessibility, and frontend usability across multiple features.
- Participated in code reviews, deployment workflows, and CI/CD practices using Git, GitHub, and other development tools.

Projects

Confido [Next.js, Node.js, Express, PostgreSQL]: A role-based interview questions generator

- Project is live at: v59-tier3-team-32-web.vercel.app. Github repo: github.com/chingu-voyages/V59-tier3-team-32.

Routana [React, Node.js, Express, Drizzle, Neon]: A personalized learning and goal-oriented roadmap generator

- Project is live at: routana.onrender.com. Github repo: github.com/absterr/Routana.

Scrib [Next.js, Bun, Drizzle, Neon, Yjs]: A real-time collaborative document and note-taking application

- Project is live at: scrib-puce.vercel.app. Github repo: github.com/absterr/scrib.

Education

Federal University of Technology, Minna | Minna, Niger
Computer Engineering | 02/2026
